

General Information

Chemical Formula	$C_6H_5CH_3$	
Synonym	MethylBenzene	
Origin	China	
H.S. Code	2902.30.00	
CAS No.	108-88-33	
Molecular Weight	92.14 g mol ⁻¹	

Application

Fuel Industry	Toluene can be used to improve the performance of internal combustion engines. It can also be used the blending of jet fuel surrogates due to the presence of aromatic compounds in its structure.
Cosmetics Industry	Toluene is used in cosmetic products such as nail polish to give of a smooth, glossy effect upon evaporation.
Other applications	Toluene is used in haemoglobin extraction from red blood cells in research experiments. It is also used as a coolant in nuclear reactors due to its relatively good heat transfer properties.

Specification

Property	Units	Value
Purity	%	98.50 Min
Appearance		Clear and free from suspended matter
Acid Wash Colour		2 Max
Benzene	%	0.1 Max
Specific Gravity		0.869 - 0873
Colour		20 Max

Packaging

- 80 @ 180 kg Drum, 14.4 MT / 20' FCL
